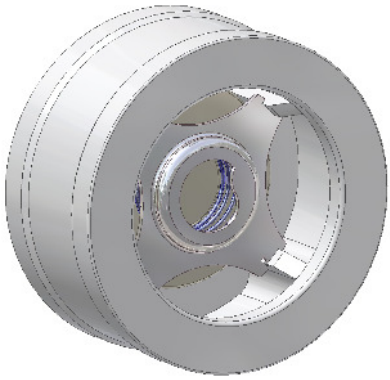
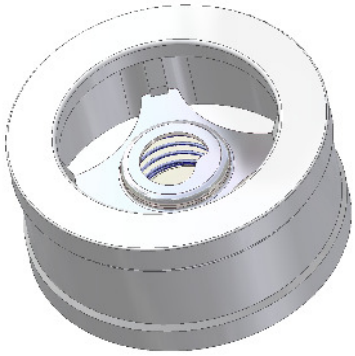
Non Return Valve Type DSF
DN015 - 100



Designation	Material
Body	see table
Valve plate	see table
Spring cap	see pricelist
Spring	see pricelist
Soft sealing	see table

Technical specifications
Placement between flange according to DIN EN 1092-1, PN10-160 and ANSI B16.5 CL. 150-900lbs
Nominal pressure depending on model
Overall lengths according to DIN EN 558, basic range 52 (K5)
Tightness according to DIN EN 12266-1, Leakage Rate D (Sealing M, T) and Leakage Rate A (Sealing E, P, V)
Operational limits according to DIN EN 1092-1
Identification according to DIN EN 19



Utilisation
For liquids, gases and steams in all process technology.

Constructional Features
Centrering through body-outside-diameter
On both sides large flange connection faces
Guiding of valve plate by body ribs

Special Types
Hastelloy C4 springs (up to 300°C) and Nimonic (up to 400°C).
Special springs for different opening pressures

Pressure drop diagramm

Pressure drop diagram for water at 20°C with opened valve and horizontal flow.
For calculating the pressure drop of the medium the equivalent water flow volume has to be calculated..

$$\dot{V}w = \dot{v}\sqrt{\frac{\rho}{1000}}$$

$\dot{V}w$ = Equivalent water flow volume in m3/h
ρ = Density of the medium (in use) kg/m3
$\dot{v}$ = Flow volume of the medium (in use) in m3/h
